RESEARCH EXPERIENCE

Graduate Researcher, UC Santa Cruz (2014 - 2019)

Investigated the comprehension of discourse markers in human and machine speech, and the effect of backstories in HCI (Advisor: Dr. Jean E. Fox Tree, Spontaneous Communication Laboratory).

Designed and conducted experiments on the contribution of auditory and visual cues towards the comprehension of sarcasm (Advisor: Dr. Nicolas Davidenko, Perception Lab).

Graduate Research Assistant, Helen Wills Neuroscience Institute, UC Berkeley (2012 - 2014)

Conducted several studies involving TMS and fMRI. Coordinated, scheduled, and ran participants independently, assisting in data collection and analysis, and created an annotated bibliography in the preparation of a literature review (Advisors: Drs. Dobromir Rahnev and Mark D'Esposito).

Undergraduate Researcher, Lewis and Clark College (2009 - 2012)

Worked on individual and team projects with humans and rats, using behavioral and physiological measures and conducted data analysis in SPSS (Advisor: Dr. Yueping Zhang).

MENTORING RESEARCH ASSISTANTS

- As a graduate student researcher, I have interviewed, hired, and mentored thirteen undergraduate researchers in Psychology. Of these, twelve have identified as female, one as male.
- Mentorship has taken the form of in-depth descriptions of participant running procedures, training in using various technologies around the lab, as well as some basics in Python coding.
- In addition to this training, I advised on graduate program applications and professional development, and wrote recommendation letters.

RESEARCH INTERESTS

My research primarily focuses on first impressions in the context of human-computer interaction. More broadly, I am interested in how people dehumanize those they see as different from and/or competitive with themselves, and (re)humanize those they see as resembling and/or helpful to themselves (even when it comes to non-human agents). In my research, I examine language as well as various other forms of multimodal self-expression, such as music, dance, and games.
